

PROJECT REVIEW

# Project Pack Checklist

What helps us review a façade package properly before pricing, mobilisation or technical discussion.

## Short version first. Detail where it matters.

Send enough information for scope, access and responsibility to be clear before attendance. Complex packages are welcome. Unclear information slows everyone down.

### Required before review

- Drawings and elevations
- Specification or system information
- Scope of works
- Site location and current stage
- Access method and restrictions
- Programme expectations
- Photos or survey information

### Helpful for pricing

- Approximate m<sup>2</sup> or quantities
- Package boundaries and exclusions
- Known drawing revisions
- Interface and opening details
- Fire / cavity barrier details where relevant
- Working hours and site restrictions

### Commercial route

- Main contractor or package manager details
- Tender / live site / completion stage
- Preferred start window
- Payment route and documentation expectations
- Named site / PM / QS contact

### Send to Cladders.co.uk

- Project packs: [enq@cladders.co.uk](mailto:enq@cladders.co.uk)
- General enquiries: [info@cladders.co.uk](mailto:info@cladders.co.uk)
- WhatsApp: +44 7411 518 229
- Use the full project pack form on the Contact page

This checklist is not a design review, fire engineering review or compliance sign-off. It helps us understand whether the installation package is clear enough to price or discuss responsibly.
